

Sketching with Hardware

07: Libraries & NeoPixel

Day 3: Wednesday, xx.yy.

09:00 Libraries & NeoPixel

11:00 Electronics 03

12:00 *Lunch Break*

13:00 Sensors & Actors

16:00 Demos

17:00 End

Arduino Libraries

- Expand the functionality of the Arduino
- Arduino is an open platform
- Many compatible products from different manufacturers
- Libraries for easier integration of those components

Examples for Libraries

- **Memory** (EEPROM, SD)
- **Networking** (Ethernet, GSM, WiFi)
- **Protocols** (SPI, SoftwareSerial)
- **Output** (LCD, TFT, Keyboard)
- **Signal processing** (debouncing, FFT)

Installing Libraries

<https://www.arduino.cc/en/Guide/Libraries>

- Library Manager:
 - Easy installation using the IDE
 - *Sketch* → *Include Library* → *Manage Libraries...*
- Importing ZIP-Files:
 - *Sketch* → *Include Library* → *Add .ZIP Library...*
 - Sample programs are only shown after restarting the IDE
 - Necessary for some manufacturers
- Manual installation:
 - Possible, but rarely necessary → we skip this one

NeoPixel

WS2812-LEDs

- Chip with RGB-LEDs
- Can be controlled with a serial protocol
- Easy to use library for Arduino

<https://i.ytimg.com/vi/aTfXeM4NJJs/maxresdefault.jpg>

Install the NeoPixel Library...

<https://learn.adafruit.com/adafruit-neopixel-uberguide/arduino-library-installation>

- *Sketch* → *Include Library* → *Manage Libraries...*
- Search for “*NeoPixel*”
- Choose the latest version of “*Adafruit NeoPixel*”
- Click the “*Install*” button

Connecting the LED strip

Resistor: 220Ω , Capacitor: $47\mu\text{F}$

created with Fritzing

Exercise: NeoPixel
